

## Introduction:

Good [morning/afternoon/evening], everyone! Today, I'm excited to share Treasure Hunt Duel, a fun two-player game that combines strategy, quick thinking, and a little bit of luck. The goal is simple: find the hidden treasure before your opponent does.

## Game Overview:

Treasure Hunt Duel is a game where two players compete to find treasure on a grid. Here's the twist: you and your opponent pick your grid cells at the same time, but you won't know each other's choices until after you've made your move.

## Here's how it works:

1. **Goal:** Pick a grid cell that's as close to the hidden treasure as possible.
2. **Game Modes:**
  - Classic Mode: A smaller 3x3 grid for quick games.
  - Advanced Mode: A larger 5x5 grid for a bigger challenge.

## How to Play:

The game follows three simple steps:

1. **Pick Your Spot:** Both players choose a cell on the grid.
2. **Reveal the Outcome:**
  - If both pick the same spot, they split the treasure 50/50.
  - If you pick different spots, the player closer to the treasure gets a bigger share:
  - Classic Mode: Closer player gets 75%, the other gets 25%.
  - Advanced Mode: Closer player gets 80%, the other gets 20%.
  - If both players are the same distance from the treasure, they split it evenly.
3. **Replay:** You can reset and play again to improve your strategy.

## Features:

- **New Challenges Every Round:** The treasure is hidden in a different spot each time.
- **Simple Strategy:** You'll need to think ahead and try to guess your opponent's moves.
- **Easy to Use:** The game is quick to set up, and anyone can play.
- **Bright, Clear Design:** The colorful grid and fun visuals make the game enjoyable for all ages.

## Why Play Treasure Hunt Duel?

This game is easy to learn, exciting to play, and keeps you coming back for more. Whether you're playing with friends, family, or just for fun, it's a great way to test your skills and have a good time.
